

**Union Medical Healthcare introduced Covid-19 Rapid Test Kit  
Approved by Conformité Européene, with accuracy of over 90% in clinical tests**

(30 March 2020, Hong Kong) – **Union Medical Healthcare Limited** (“Union Medical Healthcare” or the “Company”, which together with its subsidiaries, is referred to as the “Group”; SEHK stock code: 2138), a leading integrated medical group in Hong Kong, announces that the Group has launched the sales of COVID-19 Rapid Test Kit (“Rapid Test Kit”) approved by Conformité Européene in mid-March.

With regard to the spread of epidemic that made citizens worry about their personal safety, Union Medical Healthcare has introduced “Rapid Test Kit” for individual screening purpose. “Rapid Test Kit” has the following clinical test data: 1,003 study case centers, with an accuracy of 91.78% and specificity of 98.72%, a false positive response of 1.28%, and a false negative response was 8.22%.

Currently, the antibody tests used by the “Rapid Test Kit” are not the standard specified by international health authorities to screen the novel coronavirus, thereby cannot be used as diagnostic tests for confirmation. Meanwhile, antibodies may take more than a week after infection before it can be detected through such blood tests, and it may have the chance of false positive or false negative test results. A negative test result does not guarantee that the testing subject will not become infected by COVID-19 or develop symptoms at a later date. In case of having relevant symptoms, contacted with confirmed cases or with travel history to high risk areas with outbreak of the COVID-19 infection, further testing and follow up should be arranged.

The “Rapid Test Kit” cannot replace the confirmatory tests, RT-PCR, recommended by international health authorities. If relevant tests are needed, Union Medical Healthcare also offers RT-PCR confirmatory tests in its service centres.
