

[FOR IMMEDIATE RELEASE]

**EC Healthcare expects to achieve a record-high sales volume in first half of
FY21/22**

Represents more than 60% Y-o-Y increase to over HK\$1,520 million

(11 Oct 2021, Hong Kong) **EC Healthcare** (the “Company”, which together with its subsidiaries is referred to as the “Group”, SEHK stock code: 2138), the largest non-hospital medical group in Hong Kong*, is pleased to announce the Group's expected to achieve a record-high sales volume from April to September 2021(the “Reporting Period”).

Benefiting from the strong demand on medical services and improving local consumption sentiment by full-fledged retail sector recovery, the Board expects the Group to achieve a record-high overall sales volume of no less than HK\$1,520 million for the Reporting Period, representing a no less than 60% y-o-y increase and a no less than 43% increase compared with the same period in 2019. Benefiting from positive synergies arisen from the acquisition of medical assets in the second half of the last financial year and the strong client demand for the Group’s medical service, the Group achieved a no less than 100% y-o-y increase for medical services sales volume, and a no less than 152% increase compared with the same period in 2019.

For Mainland China, thanks to the unmet demands of mainland customers and the continued business growth riding on its leading position in aesthetic medical industry, the Group is expected to record a no less than 34% y-o-y increase for the reporting period, and a no less than 94% increase compared with the same period in 2019.

Mr. Eddy Tang, Chairman, Executive Director and Chief Executive Officer of EC Healthcare said, “Looking ahead, the Group is optimistic about the business performance given the recent launch of consumption voucher scheme by the Hong Kong Government and pandemic remains well under control in Hong Kong. The population that completed second vaccine dose has been at approximately 63.2% as of 7 October 2021. We believe that the upcoming consumption will further rebound after the re-open of the border between mainland China and Hong Kong. Moreover, we have been developing our businesses through organic growth as well as mergers and acquisitions, leveraging our advancement in information technology, branding and service to build a closed-loop healthcare ecosystem to consolidate the healthcare market.”
